

Secure Your Mission Critical Systems with Colocation

Where are your servers and infrastructure located today? Does the facility or space include proper cooling and power redundancy? Are your compliance needs being met?

Safeguard your mission-critical applications and systems in fully compliant data centers with redundant power, cooling and connectivity with colocation.

ADVANTAGES OF COLOCATION

- Frees up space, budget, and capital expenditures
- Flexible and scalable to accommodate your business needs
- Provides fully redundant power and cooling
- Meets auditing and compliance needs
- Flexible locations for production and disaster recovery workloads
- Protects mission-critical data and systems with 24/7 security
- Provides hybrid cloud options for ultimate flexibility

As your trusted IT and telecom advocate, IT Company can help your business strategize, source and implement the best colocation solution for your business. Our primary goal is to ensure that you, our customer, receive the best possible solution that maps and scales to your business objectives.
